

Pequea feeders allow your cattle efficient feeding, saving you time & money. These feeders handle loads of round or square bales or any mixture of grain & forage, feeding up to 52 head at one time.

Pequea feeders with optional insert sheets allow you to feed silage or green chop & the double trough design keeps feed moving to cows. An efficient slant-bar system prevents cows from pushing each other away from feeding spaces, reducing loss of feed from spills. Optional end gates open fully to allow convenient 3 pt. loading. The low tank height accommodates any size cow.

***510S, *520, *525, *530T, 520H**

*End-gate models available

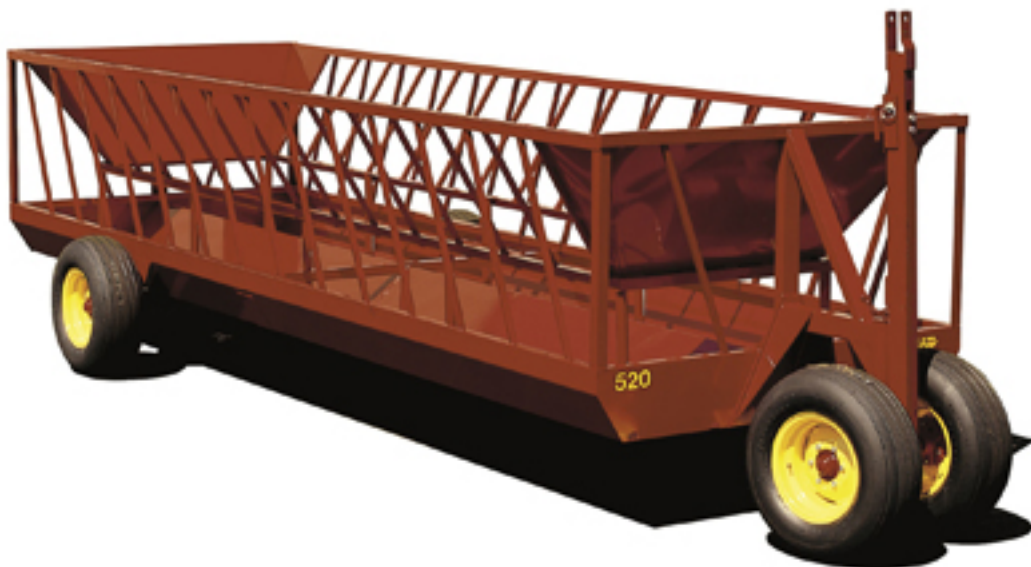

510S, 510E

- Top load and end-gate models available
- 10' bunk length
- Skid model
