Feeders

Save time and money with Pequea feeders. They handle loads of round or square bales or any mixture of grain & forage, feeding up to 52 head at one time. Optional insert sheets allow you to feed silage or green chop & the double trough design keeps feed moving to cows. An efficient slant-bar system prevents cows from pushing others away from feeding spaces, reducing feed loss from spills. Optional end gates open fully to allow convenient 3 pt. loading. The low tank height accommodates any size cow.
