

# PEQUEEA TURF

## THE ULTIMATE TOPDRESSER

CAPABLE OF HANDLING ALMOST ANY MATERIAL THAT CAN BE SPREAD

# SuperSpread™

Pequeea SuperSpread™ units are built to last and are uniquely designed to evenly spread a wide variety of materials from aggregates to mulch. The “V” shaped body increases efficiency and provides greater maneuverability. Hydraulic controls adjust belt and spinner speeds to each job’s requirements. This not only improves results, it reduces waste as well. With a choice of three drive styles and three hopper sizes, green industry professionals will have the right equipment for their topdressing job.

Infinitely adjustable hydraulic controls vary speed of conveyor and delivery device.

A smooth operating manual end-gate lift provides precise control of material flow.

A swivel "pin hitch" allows travel over uneven terrain without effecting the operation of the towing vehicle. The side wind jack makes hitching to a variety of vehicle heights effortless.

A unique conveyor and agitator keep the load moving smoothly and efficiently.

Large 22 1/2" spinners with six paddles each spread material evenly up to thirty feet.

Conveyor main roller turns on a fully adjustable heavy duty bearing set.

An accessible heavy duty chain transfers power from a hydraulic motor to the conveyor main drive roller.

Three drive styles available: PTO, Tractor Hydraulic, or On-Board Hydraulic.  
 Three hopper sizes available offering heaped capacity from 1.50 cubic yards to 6 cubic yards.

## Optional Distribution Systems

Mulch beds and sand traps can be filled with control and ease using the optional conveyor off-loader.

The optional beater can be used for numerous special applications.

The optional brush allows for precise application of fine spread material.

**SuperSpread-VSS comes with all four distribution systems standard, offering optimal versatility for your topdressing material, and topdressing needs.**
